The Rotate my Links Tool Bar.

This tool bar first saw the light of day in mid July 2009, Developed by Nicholas McIntosh of incomebees.com supported by the group [Real teams working for all](#) In the [Marketing Mastermind social network](#).

Not only is the tool bar free to download and free to use, one of its great features is switching technology, In essence, you can save browser space having tool bars stacked behind each other bringing to the front the one you want to use at the time.

Ok so why use a tool bar in the first place? Well just one or two clicks to get where you want to be is very convenient and a great time saver.

Now the majority of tool bars I have come across, I would term as a single function, for example, the Google tool bar only has links to Google

programs.

The Rotate my links tool bar is multi functional with a great range of links to some of the most used programs. In fact, I have been able to remove some other tool bars like Google and Yahoo giving me even more working browser space.

Ok so what's on this tool bar then?

Working from left to right the rml logo has a drop down menu with file and tool functions, if you click the logo itself, it takes you to the Rotate my links site.

The next function is a search window driven by Google.

We now come to the link's icon, This drop down menu is full of very useful links, 51 at this time mostly organized into appropriate sub menus so it is very easy to navigate.

Links to Marketing tools, covering things like Email and safe lists, Traffic generation, the affiliate marketplace and tracking and management sites.

Communication tools, linking to email and messenger services.

Marketing programs, some of the most popular marketing programs on line.

seo tools, for keyword research, domain names etc.

Free software, more time saving utilities to help your business grow.

and Payment processors pay pal and Alert pay.

Links included in this section to places like Google and Yahoo giving me the opportunity to remove other tool bars.

The next little icon is the green tick, the drop down on these one links to Marketing Mastermind social network, the forum and some info for you to get to know the development team.

The speech bubble Icon is a direct link to the conference room used for news, updates and Q& A Sessions, these are also recorded for those that can't make the live sessions.

The next handy icon is the clock, giving world time, so easy to plan ahead, see if you can attend the next Webcast, or save you the embarrassment of making a Skype or phone call to someone in the middle of the night in their part of the world.

Do you tweet? The next icon, the twitter bird has a drop down list of great twitter applications.

Bringing on the gift box, this icon links to other great switching toolbars, web2, article directory and social media are covered so far, I have no doubt, there will be more to come.

Another Icon will bring up your Skype or any other communication application you want to set it to.

One of my favorite icons comes next it is the Audio player, although programmable it is already pre programed with some on line radio stations including Motivational radio, so easy to click start at broadcast times, better still all the archive of previous shows are also available for your listening pleasure, along with the recordings I mentioned earlier from the conference room.

The last item on the tool bar has really helped me focus! Now it may be a strange thing to ask but how many times a day do you check your email just to see what new messages you have?

Well, it used to be something of an obsession with me, I would be in the middle of doing some work and think to myself, I had better check my email then I would just go. Interrupting the work I was doing, well no more, I now just look at the tool bar and it tells me how many new messages I have in my mail.

The envelope icon is configurable to check any and all your mail servers, when you are ready one click will open your mail page to read the new

messages.

when you have done close the mail page and then concentrate on whatever task you want to do next. What a great time saver.

So there you have it a tool bar that is free to download and free to use packed with useful links, saving both time and space with its switching technology.

However, the story does not end there!

Rotate my Links is also a very effective down line list builder and advertising system.

So how does this work?

As a member you can place your affiliate links of any and all the linking programs inside the tool bar into the rotator.

That puts your link in front of hundreds or thousands of tool bar uses at any one time, Now that is massive exposure.

Using the link protector system provided you can also create more exposure for your primary business or any other program you want to promote.

As a member you can request other links to be added to the tool bar.

An additional benefit of membership is also free radio advertising.

The 30 minute video on the Rotate My Links homepage can explain all this far better than I can, not only does it give you all the information for the tool bar but includes a very important marketing lesson.

So does the system work?

I have to say a resounding YES to that.

I have been running the system for the last month.

I have new down line members in the programs, I entered my affiliate links for.

I have new affiliate members giving me a monthly income.

I have increased the traffic to my own web sites.

I have saved on browser space.

To be perfectly honest in the last eleven years I have been on line I have not come across another program giving these types of results so quickly, for such a low investment of \$15 and a couple of hours work to set up.

What's even better is the tool bar is only a few weeks old, as it spreads throughout the Internet my little time investment will pay me back time and time again.

My recommendation, download the Free tool bar, if only to save browser space and have convenient time saving usable links.

If you want to explode your own marketing efforts exponentially join the program.

Have you downloaded your free switching tool bar yet? if not why not?
